Practice Assignment

File Handling

1. Write a program to get rollno and marks of 5 students.
   Store the details of the passed students in a file named 'passed.txt' and store the others in a separate file named 'failed.txt'

2. Write a program to copy the contents of a file in another. While copying replace all the spaces with a comma.
   For example : if the source file has the data
   'India USA Germany Spain'

   the target file should contain

   'India,USA,Germany,Spain'
